Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE							
 Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-6 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Challet.

Note figure 2 of Challet which shows plastic ring #14 member with integral pins #15, #16 and a metal hammer #13.

Further cited of interest are LaForest, Johnsson, Ishii and Meury.

Applicant is correct that the restriction requirement set forth in paper no. 4 (12-11-01) should have been obvious expressed as a "lack of unity since this application is a 371 of PCT/CN99/00061.

There is lack of unity because there is no special technical feature in both groups. Also, the process does not inherently produce the product. The process is specific to molding both the hammer and the ring and inserting the hammer into the ring. The claimed product is not limited to molded materials. Thus the lack of unity holding is deemed proper and made final. Consequently claims 7 and 8 are withdrawn from further consideration.
